Program Specification of Medical Doctorate Degree of Medical Parasitology

Sohag University

Faculty of Medicine

A. Basic Information

- 1. Program title: MD. Degree of Medical Parasitology
- 2. Program type: Single
- 3. Faculty: Faculty of Medicine
- 4. Department: Medical Parasitology
- 5. Coordinator:Dr. Hana El-Hadi.
- 6. Ass. Coordinator: Dr. Aml Mostafa.
- 7. External evaluator: Prof. Dr. Fatma Galal.
- Last date of program specifications approval: Faculty council No.. "317", decree No. "1533" dated 17/12/2018.

B. Professional Information :

1. Program aims:

- Our aim is to graduate competent parasitologists able to perform:
 - 1. Perfect Professional application of scientific <u>knowledge and skills</u> essential for the practice and research work of medical parasitology.
 - 2. <u>Skills</u> necessary for applying the scientific analytic methods in medical parasitology.
 - 3. <u>Skills</u> necessary for applying related scientific data in medical Parasitology for the purpose of solving community problems, using available resources and saving the environment.
 - 4. Active participation in community needs assessment and problem identification from the medical Parasitology view.
 - 5. Skills of communication and team work, cooperating with colleagues and leading subordinates.
 - 6. elf learning, modern technological aids and research abilities necessary for continuous professional development and valuable addition to the field of medical parasitology
 - 7. Ability to teach and train others to develop themselves in the field of medical Parasitology.
 - 8. Having the ability to engage in further following researches and training in any branch of medical Parasitology.
 - 9. Sound ethical and professional principles necessary for establishment of good communication with students and colleagues.
 - 10. Proper decision making in different professional situations.

2. Attributes of the postgraduate:

- 1. Efficient in carrying out the basics and methodologies of scientific research in Parasitology.
- 2. The continuous working to add new knowledge in his field.
 - 3. Applying the analytical course and critical appraisal of the knowledge in his specialty and related fields.

Program Specifications of Master Degree of Medical Parasitology

Sohag University

Faculty of Medicine

Program Specification A- Basic Information

1. Program title: MSc. Degree of Medical Parasitology

- 2. Program type: single
- 3. Faculty: Faculty of Medicine
- 4. Departments : Medical Parasitology
- 5. Coordinator: Dr. Hana El-Hadi.
- 6. Ass. Coordinator: Dr. Aml Mostafa.
- 7. External evaluator: Prof. Dr. Fatma Galal.
- Last date of program specifications approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018.

B- Professional Information:

1. Program aims:

Our aim is to graduate competent parasitologists mastering the professional scientific knowledge and skills essential for the practice and research work of medical parasitology, through providing:

- 1. Scientific knowledge of medical parasitology according to the national and international standards.
- 2. Skills necessary for applying the scientific analytic methods in medical parasitology.
- 3. <u>Skills</u> necessary for applying related scientific data in medical Parasitology for the purpose of solving community problems, using wisely available resources and saving the environment.
- 4. Active participation in community needs assessment and problem identification from the medical Parasitology view.
- 5. Skills of communication and team work, cooperating with colleagues and leading subordinates.
- 6. Self learning, modern technological aids and research abilities necessary for continuous professional development.
- 7. Having the ability to engage in further following researches and training in any branch of medical Parasitology.
- 8. Sound ethical and professional principles necessary for establishment of good communication with students and colleagues.
- 9. Sufficient training on leadership responsibilities.

Program Specification of Medical Doctorate Degree of Medical Parasitology

B. Professional Information :

1. Program aims:

Our aim is to graduate competent parasitologists able to perform:

- 1. Perfect Professional application of scientific <u>knowledge and skills</u> essential for the practice and research work of medical parasitology.
- 2. <u>Skills</u> necessary for applying the scientific analytic methods in medical parasitology.
- 3. <u>Skills</u> necessary for applying related scientific data in medical Parasitology for the purpose of solving community problems, using available resources and saving the environment.
- 4. Active participation in community needs assessment and problem identification from the medical Parasitology view.
- 5. Skills of communication and team work, cooperating with colleagues and leading subordinates.
- 6. elf learning, modern technological aids and research abilities necessary for continuous professional development and valuable addition to the field of medical parasitology
- 7. Ability to teach and train others to develop themselves in the field of medical Parasitology.
- 8. Having the ability to engage in further following researches and training in any branch of medical Parasitology.
- 9. Sound ethical and professional principles necessary for establishment of good communication with students and colleagues.
- 10. Proper decision making in different professional situations.

2. Attributes of the postgraduate:

- 1. Efficient in carrying out the basics and methodologies of scientific research in Parasitology.
- 2. The continuous working to add new knowledge in his field.
- 3. Applying the analytical course and critical appraisal of the knowledge in his specialty and related fields.

- 4. Merging the specialized knowledge with the other related knowledge with conclusion and developing the relationships in between them.
- 5. Showing a deep awareness with the ongoing problems, theories, and advanced sciences in his specialty.
- 6. Determination of the professional problems and creating solutions for them.
- 7. Efficient in carrying out the professional skills in his specialty.
- 8. Using advanced suitable technologies which serves his practice.
- 9. Efficient communication and leadership of team work in his specialty.
- 10. Decision making through the available information.
- 11. Using the available resources efficiently and working to find new resources.
- 12. Awareness with his role in the development of the society and preserve environment.
- 13. Behaving in a way which reflects his credibility, accountability, and responsibility.
- 14. Keeping continuous self development and transfer his experiences and knowledge to others.

3. Intended learning outcomes (ILOs):

a) Knowledge and understanding

By the end of the program the MD. graduate should be able to:

- a1. Have a up to date knowledge about parasites affecting human beings allover the world and zoonoses.
- a2. Enumerate the geographical distribution (including recent changes and the environmental effects) and life cycle of each, inside and outside the body.
- a3. Describe the detailed morphology of each parasite.
- a4. Enumerate the pathology, clinical symptoms and complications caused by parasites.
- a5. Describe laboratory tests needed for diagnosis of each case.
- a6. List drugs and instructions used for treating each case.
- a7. List control methods used against parasites.
- a8. List snails and their medical importance, especially of Egypt.
- a9. Mention parasitic immunity bases.
- a10. Enumerate molecular genetics as related to medical parasitology.
- al1. Mention the environmental effects as related to medical parasitology.
- a12. Describe moral and legal aspects in the profession of medical parasitology.
- a13. Enumerate bases and standards of performance in the profession of medical parasitology.
- a14. Enumerate the recent advances in biostatistics and computer.
- a15.Enumerate the recent advances of principles, methodologies, tools and ethics of scientific research.

b) B. Intellectual Skills:

By the end of this program the MD. graduate should be able to:

- b1. Differentiate between parasites affecting the same organ.
- **b2.** Differentiate between parasites present in the same sample.
- b3. Differentiate between parasites inhabiting the same geographical location.
- b4. Analyze given data and use it in problem solving.
- b5. Use self learning skills in solving problems.
- b6. Use analytical skills in anticipating risks.
- b7. Criticize in a scientific pattern at least 15 published papers in the different branches of Medical Parasitology (parasite distribution and public health or statistics, lab. Animals and pathology of parasites or drugs, parasites and immunology, snails....etc
- b8. Present creative and genuine ideas, lectures, reviews, projects or others adding to the field of medical parasitology.
- b9. Be persuasive and can support his/her ideas with solid scientific facts.

- b10. Perform professional decision making and planning for different professional scenarios.
- b11. Conduct research studies that adds to knowledge.
- b12. Formulate scientific papers in the area of Medical Parasitology

c) Professional and Practical Skills:

- By the end of this program the MD.graduate should be able to:
- c1.Recognize of the infective and the diagnostic stages of the parasites.
- c2.Identify of some stages of the parasites.
- c3.Identify of some of the medically important intermediate host especially those present in Egypt.
- c4.Perform some laboratory tests available in the department lab.
- c5.Perform available serological tests.
- c6.Deal with lab animals: infecting, sacrifice, dissecting and examining within ethical and moral borders.
- c7.Collect and rear of snails or medically important arthropods.
- c8.A box of at least 75 prepared slides of different entities are required.
- c9.Attend and participating in scientific conferences, meetings, workshops and thesis discussion that update relevant recent topics in molecular biology, relevant biochemical and geno-typing of parasites, and emerging parasitic problems.
- c10. Design new methods, tools and ways of professional practice
- c11.Create new successful ways in conducting informations and assessment of the performance of the students.
- c12. Produce new ideas for diagnosis or control in his/her field.

d) General and Transferable Skills:

By the end of this program the MD. graduate should be able to:

- d1. Use appropriate computer program packages.
- d2. Collect scientific data from the computer.
- d3. Work in groups, as a leader or as a college.
- d4. Use clear parameters in assessment of others (during teaching process).
- d5. Skillfully practice communication skills in learning, teaching and scientific communications.
- d6. Use the sources of biomedical information to remain current with advances in knowledge and practice (self learning).
- d7. Maintain a professional image in manner, dress, speech as well as the interpersonal relationships.
- d8. Work within limits of knowledge and experience.
- d9. Participate in the medical progress by having the basis of medical research studies.

d10. Participate in related scientific meetings.

d11. Work coherently and successfully as apart of a team

4. Academic Standards:

Sohag faculty of medicine adopted the general National Academic Reference Standards (NARS) provided by the national authority for quality assurance and accreditation of education (naqaae) for postgraduate programs. This was approved by the Faculty Council decree N0.6854, in its cession N0.177 Dated: 18/5/2009. Based on these NARS; Academic Reference Standards (ARS) were suggested for this program. These ARS were approved by Faculty Council decree N0.7528, in its cession N0.191, dated: 15/3/2010. The adoption of NARS and the suggested ARS were approved by University council degree No 587, in its cession No.60. Dated 26-12-2011

5. Curriculum structure and contents:

- 5.a- Program duration: 7 semesters.
- 5.b- Program structure:
- 5.b.i- Number of hours per week:

| | Hours/week | | | |
|---------------------------|------------|-----------|----------|--|
| Subject | Lectures | Practical | Clinical | |
| <u>First Part:</u> | | | | |
| Minors: | | | | |
| Bio Statistics & Computer | 2 | 2 | | |
| Research Methodology | 2 | 2 | | |
| optional courses: | | | | |
| Biochemistry | 4 | | | |
| Tropical Medicine | 4 | | | |
| Clinical Pathology | 4 | | | |
| Microbiology and Immunity | 4 | | | |
| Public health & Community | 4 | | | |
| Medicine | | | | |
| Histology | 4 | | | |
| Medical genetics | 4 | | | |
| Pathology | 4 | | | |
| Second Part: | | | | |
| Medical Parasitology | 5 | 7.66 | | |

| code | Item | | | % |
|--------|---|------------|------|------|
| b.i | Total credit hours | Compulsory | 90 | 100 |
| | | Elective | 0 | 0 |
| | | Optional | 0 | 0 |
| b.iii | credit hours of basic sciences courses | | | 7.8 |
| b.iv | credit hours of courses of social sciences and huma | 0 | 0 | |
| b.v | credit hours of specialized courses: | 60 | 66 | |
| b.vi | credit hours of other course | | | |
| b.vii | Practical/Field Training | | | 8.9% |
| b.viii | Program Levels (in credit-hours system): | | | |
| | Level 1: 1 st part | 15 | 16.7 | |
| | Level 2: 2 nd Part | | | 57.8 |
| | Level 3: Thesis | | 15 | 16.7 |

6. **Program Courses** * 3courses are compulsory + 2 optional courses 6.1- Level of program: Semester...1....

First part :

| Course title | Total No. of | No. of hours / week | | | Programme ILO |

7. Program Admission Requirements

I- General Requirements.

- Candidate should have either MBBch degree from any Egyptian Faculty of Medicine or Equivalent Degree from Medical Schools abroad approved by the ministry of high Education.
- Candidate should know how to speak & write English well
- Candidate should have computer skills.
- Follow postgraduate bylaw Regulatory rules of Sohag Faculty of Medicine approved by the ministerial decree No. (44), dated 6/1/2010.

II- Specific Requirements

• Master degree in Medical Parasitology with at least "Good Rank".

8. Regulations for Progression and Program Completion

Duration of program is 90 credit hours (\geq 7 semesters \geq 3.5 years), starting from registration till acceptance of the thesis; divided to:

First Part: (15 Credit hours \geq 6 months \geq 1 semester):

- Program-related basic science, Research Methodology, Ethics & medical reports, Biostatistics and computer.
- At least six months after registration should pass before the student can ask for examination in the 1st part.
- Two sets of exams: 1st in October 2nd in April after fulfillment of the credit hours.
- At least 60% of the written exam and 60% of the total oral and practical/clinical is needed to pass in each course.
- For the student to pass the first part exam, a score of at least 60% (Level D) in each course is needed.
- Those who fail in one course need to re-exam it only.
- GPA of ≥ 1.3 is needed to pass this level (semester).

Second Part: (50-60 Credit hours ≥24 months= 4 semesters):

- Program related specialized science of Medical Parasitology courses. At least 24 months after passing the 1st part should pass before the student can ask for examination in the 2nd part.
- Fulfillment of the requirements in each course as described in the template and registered in the log book (8 Credit hours; with obtaining ≥75% of its mark) is a prerequisite for candidates to be assessed and undertake part 1 and part 2 examinations; the credit hours of the logbook are calculated as following:
 - Each Cr. Hr.= 60 working Hrs.
 - Logbook= 8 Cr. Hr. X 60 working Hrs = 480 Working Hrs.
 - Collection of working Hrs. is as following:

| Activity | | Hrs |
|------------------------------------|--|------------------|
| Grand rounds | اجتماع علمي موسع | ٦ |
| Training courses | دورات تدريبية | 12/ day |
| Conference attendance | حضور مؤتمرات علمية دا ثا | \ ¥ /] |
| | داخلی خارجة | ۱۲/day 18/day |
| Thesis discussion | حضور مناقشات رسائل | ٦ |
| Workshops | حضور ورش عمل | ۲/day |
| Journal club | ندوة الدوريات الحديثة | ٦ |
| Seminars | لقاء علمي موسع | ٦ |
| Morbidity and Mortality conference | ندوة تحليل المخاطر المرضية أوالوفاة | ٦ |
| Self education program | برنامج التعليم الذاتي | ٦ |

- Two sets of exams: 1st in October 2nd in April.
- At least 60% of the written exam is needed to be admitted to the oral and practical exams.
- 4 times of oral and practical exams are allowed before the student has to re-attend the written exam.

Third Part (Thesis) (15 Credit hours =24-48 months=4-8 semester):

- 1. Documentation of the subject should not be delayed for > 1.5 years after registration.
- 2. Could start after registration and should be completed, defended and accepted after passing the 2nd part final examination, after passing of at least 24 months after documentation of the

subject of the thesis and after publishing of at least one paper from the thesis in a specialized peer-reviewed journal.

3. Accepting the thesis is enough to pass this part.

9. <u>Methods of student assessments:</u>

| Method of assessment | weight | The assessed ILOs |
|-----------------------------------|--------|--|
| 1-Research assignment | | - General transferable skills, intellectual skills |
| 2-Written Exams: | | |
| -Short essay: 40% | 、o | - Knowledge |
| -structured questions: 25% | 50% | - Knowledge |
| -MCQs: 20% | Ś | - Knowledge, intellectual skills |
| -Commentary, Problem solving: 15% | | - Intellectual skills, General transferable skills |
| 3-OSPE | | -Practical skills, intellectual skills, general |
| | 50% | transferable skills |
| 4-Structured Oral Exams | 50 | - Knowledge, Intellectual skills, General |
| | | transferable skills |

Assessment schedule:

Part I:

- Biostatistics & Computer: Written Exam (2 hours) + Structured oral Exam
- Research Methodology: Written Exam (2 hours) + structured oral Exam
- The first optional course: Written Exam (3 hours) + structured oral Exam
- The second optional course: Written Exam (3 hours) + structured oral Exam

Part II:

- Medical Parasitology: Two Written Exams (3 hours for each) + structured oral Exam+ OSPE.

10. Evaluation of program:

| Evaluator | Tool | Sample |
|-----------------------------------|---------------|--------|
| 1- Senior students | Questionnaire | 3 |
| 2- Alumni | Questionnaire | 4 |
| 3- Stakeholders (Employers) | Questionnaire | 10 |
| 4-External Evaluator(s) (External | Report | 1 |
| Examiner(s)) | | |
| 5- Other | | |

Course Specifications for Applied biostatistics (with computer use) for MDdegree of medical parasitology

Sohag University

Faculty of Medicine

- 1. Program on which the course is given: MD degree in medical parasitology
- 2. Major and Minor element of program: Minor
- 3. Department offering the course: Community Medicine and public Health Dep.
- 4. Department offering the program: Parasitology.
- Academic year: Doctoral Degree First Part (new bylaws), Post-Graduate Sohag University
- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title: Course Specifications for Applied biostatistics (with computer use) for MDdegree of medical Parasitology

Code: COM0516-300

| Title | Lecture | Practical | Total | Credit hours |
|-----------------------|---------|-----------|-------|-----------------|
| applied biostatistics | 30 | 30 | 60 | 3 |

B. Professional Information

- 1. Overall Aims of Course
- To use precisely medical biostatistics and computer programs
- 2. Intended Learning Outcomes of Courses (ILOs)

a) Knowledge and understanding:

By the end of the course, the student is expected to be able to:

- a1. Enumerate the different programs of analysis of data and statistical packages
- a2. Define the recent advances of sources of data and methods of collection.
- a3. Summarize data, construct tables and graphs
- a4. Calculate measures of central tendency and measures of dispersion
- a5. Describe the normal curves and its uses
- a6. Illustrate selected tests of significance and the inferences obtained from such tests
- a7. Illustrate selected tests of significance for parametric and non parametric inferences
- a8. Identify factor analysis and discrimination analysis

b) Intellectual Skills

- By the end of the course, the student is expected to be allowed to:
- b1. understand how to collect and verify data from different sources

b2. Interpret data to diagnose prevalent parasitic health problems in the community

c) Professional and Practical Skills:

By the end of the course, the student is expected to practice the following:

c1. Perform recent advanced technological methods in collection, analysis and interpretation of data and in management of prevalent parasitic problems

d) General and Transferable Skills:

By the end of the course, the student is expected to be able to:

- d1. Use appropriate computer program packages.
- d2. Use of different sources for information and knowledge about biostatistics.

3. Contents

| Торіс | No. of hours | Lecture | Tutorial/ Practical |
|--|-----------------|---------|------------------------|
| Recent advances in collection, analysis and interpretation of data | 3 | 1 | 1 |
| -Details of Tests of significance: Proportion test | 3 | 2 | 2 |
| Chi-square test | 3 | 3 | 3 |
| Student T test | 3.5 | 3 | 3 |
| Paired T test | 3.5 | 3 | 3 |
| -Correlation | 4 | 3 | 3 |
| -Regression | 3.5 | 3 | 3 |
| -ANOVA test | 3.5 | 3 | 3 |
| -Discrimination analysis | 3.5 | 3 | 3 |
| Factor analysis | 3.5 | 3 | 3 |
| - parametric and non parametric | 3.5 | 3 | 3 |
| tests | | | |
| Total | 60 | 30 | 30 |
| Credit | 3 | 2 | 1 |

4. Teaching and Learning Methods

- 4.1- Lectures
- 4.2- Practical sessions
- 4.3- Computer search assignments
- 4.4- Computer application

5. Student Assessment Methods

| Method of assessment | The assessed ILOs |
|------------------------------------|---|
| 5.1- Observation of attendance and | - General transferable skills, intellectual skills |
| absenteeism. | |
| 5.2-Written Exam: | |
| -Short essay: 40% | - Knowledge |
| -structured questions: 25% | - Knowledge |
| -MCQs: 20% | - Knowledge, intellectual skills |
| -Commentary, Problem solving: 15% | - Intellectual skills, General transferable skills, |
| 5.3-Structured Oral Exam | - Knowledge, Intellectual skills, General |
| | transferable skills |
| 5.4 Computer search assignment | -General transferable skills, intellectual skills |

Assessment Schedule

| Assessment 1 | Final written exam | Week: 24 |
|--------------|-------------------------------|----------------------------------|
| Assessment 2 | Final Structured Oral Exam | Week: 24 |
| Assessment 3 | Attendance and absenteeism th | roughout the course |
| Assessment 4 | Computer search assignment p | erformance throughout the course |

Weighting of Assessments

| Final-term written examination | 50 | % |
|--------------------------------|-----|---|
| Final Structured Oral Exam | 50 | % |
| Total | 100 | % |

Formative only assessments: attendance and absenteeism and Computer search assignments performance.

6. List of References

6.1- Essential Books (Text Books)

1-Maxy-Rosenau Public health and preventive medicine, 2008.,Robert Wallace, publisher McGraw-Hill Medical; 15 edition.

<u>6.2- Recommended Books</u>

1- Dimensions of Community Based projects in Health Care, 2018. Arxer, Steven L., Murphy, John W.; 1st edition.

2- Parks Text Book of Preventive & Social Medicine. 2017., K. Park. BanarsidasBhanot Publishers; 23 edition.

3- Clinical Epidemiology: The Essentials, 2013, Robert F., Suzanne W. Fletcher, Grant S., publisher Lippincott Williams & Wilkins; 5 edition.

6.3- Periodicals, Web Sites, ... etc

1-American Journal of Epidemiology2-British Journal of Epidemiology and Community Health3- WWW. CDC and WHO sites

7. Facilities Required for Teaching and Learning:

- Adequate conditioned space for staff and assistants.
- Adequate conditioned teaching facilities.
- Audiovisual Aids: Data show, overhead and slide projectors and their requirements

Course Coordinator: Dr/Foad Metry Atya

Head of Department: Prof/ Ahmed Fathy Hammed

Date: 18/12/2011, Revised:1/9/2012, Revised:1/12/2013, Revised:1/12/2018

Course Specifications of Research Methodology in MD degree in Medical Parasitology

Sohag university

Faculty of Medicine

- 1. Program on which the course is given: MD degree in Medical Parasitology
- 2. Minor element of program
- 3. Department offering the program: Medical Parasitology
- 4. Department offering the course: Community Medicine and public Health
- 5. Academic year / Level; 1st part
- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A- Basic Information

Program title: Research Methodology.

Code: COM0516-300

| Title | Lecture | Practical | Total | Credit |
|------------------|---------|-----------|-------|--------|
| Research methods | 30 | 30 | 60 | 3 |

B- Professional Information

1. Overall Aims of Course

- The aim of this course is to provide the postgraduate student with the advanced medical knowledge and skills essential for the mastery of practice of specialty and necessary to provide further training and practice in the field of Parasitology through providing:
- 1. Recent scientific knowledge essential for the mastery of practice of Parasitology according to the international standards.
- 2. Skills necessary for preparing for proper diagnosis and management of community problems, skills for conducting and supervising researches on basic scientific methodology.
- 3. Ethical principles related to the practice in this specialty.
- 4. Active participation in community needs assessment and problems identification.
- 5. Maintenance of learning abilities necessary for continuous medical education.
- 6. Upgrading research interest and abilities.

2. Intended Learning Outcomes of Courses (ILOs)

a) Knowledge and understanding:

- By the end of the course, the student is expected to be able to:
- a1. Define the recent advances of screening tests pertinent to selected diseases and the at-risk approach in the application of screening tests.
- a2. Explain the usefulness of screening tests, and calculate sensitivity, specificity, and predictive values.
- a3. Describe the study design, uses, and limitations.
- a4. Enumerate the recent advances of principles, methodologies, tools and ethics of scientific research.
- a5. Explain the strategies and design of researches.
- a6. Describe bias and confounding.
- a7. Describe sampling techniques and list advantages of sampling

a8. Identify principles of evidence based medicine.

b) Intellectual Skills

- By the end of the course, the student is expected to be able to:
- b1. Conduct research studies that adds to knowledge.
- b2. Formulate scientific papers in the field of Parasitology
- b3. Innovate and create researches to find solutions to prevalent problems in the field of Parasitology
- b4. Criticize researches related to the field of Parasitology

c) Professional and Practical Skills:

- By the end of the course, the student is expected to be able to:
- c1. Master the basic and modern professional skills in conducting researches in the field of Parasitology
- c2. Design new methods, tools and ways of conducting researches. .

d) General and Transferable Skills:

- By the end of the course, the student is expected to be able to:
- d1. Use of different sources for information and knowledge to serve research.
- d2. Work coherently and successfully as a part of a team and team's leadership in conducting researches and field studies.

Course Specifications of Medical Microbiology and Immunology in MD. degree in Medical Parasitology

Sohag University

Faculty of Medicine

- 1. Program(s) on which the course is given: MD. Medical Parasitology.
- 2. Major and Minor element of program: Minor
- 3. Department offering the program: Medical Parasitology.
- 4. Department offering the course: Medical Microbiology and Immunology.
- 5. Academic year / Level: Post graduates registered for MD degree of Medical Parasitology.
- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title:Course Specifications of Medical Microbiology and Immunology in MD. degree in Medical Parasitology

Code: MIC0516-300

| Title | Lecture | Practical | Total | Credit hours |
|-----------------------------|---------|-----------|-------|-----------------|
| Microbiology and immunology | 60 | - | 60 | 4 |

B. Professional Information

1. Overall Aims of Course

By the end of the course the student should be efficiently able to:

Have the professional knowledge of the microorganisms affecting human beings all over the world and the relations between them and the parasites. The student also should recognize the pathology, clinical symptoms, complications and the perform the laboratory tests needed for diagnosis of each diseases. And should also gain the professional knowledge about the structure and function of the immune system so as to perform immunological studies needed in his/her main specialty.

2. Intended Learning Outcomes of Course (ILOs):

a) Knowledge and Understanding:

By the end of the course the student is expected to:

- a1. List the microorganisms affecting human beings allover the world particularly those related to parasites.
- a2. Describe the metabolism and genetics of organisms.
- a3. Describe the pathology, clinical symptoms and complications of each disease.
- a4. Summarize the laboratory tests needed for diagnosis of each case.
- a5. Name some of the drugs and instructions used for treatment of each case.
- a6. Describe some infection control methods
- a7. Describe the structure and function of immune system

b) Intellectual Skills:

By the end of the course the student is expected to:

- b1. Differentiate between the different microorganisms (Bacteria, viruses and fungi)
- b2. Differentiate between the different types of bacteria on the bases of staining and culturing methods.
- b3. Differentiate between organisms affecting the same body parts

c) Professional and Practical Skills:

By the end of the course the student should have the ability to

- c1. Recognize micro-organisms on morphological bases.
- c2. Identify and perform the methods of staining, culturing and biochemical reactions
- c3. Recognize and perform some serological tests used in diagnosis.
- c4. Handle of samples.

d) General and Transferable Skills:

- By the end of the course the student is expected to:
- d1. Use the computer and internet to gather scientific informations.
- d2. Practice group co-ordination.

B. Professional Information

1. Overall Aims of Course

By the end of this course the student should have the professional knowledge and skills of haematology, immunology, clinical chemistry and microbiology to support his /her study of the main specialty.

2. Intended Learning Outcomes of Course (ILOs)

The curriculum consists of theoretical, practical and training courses.

a) Knowledge and understanding:

By the end of this course the student should be expected to

- a1. Review their in formations about the physiology of blood cells (RBCs, WBCs and platelets) and homeostasis.
- a2. Review their in formations about the anatomy of the lymphatic and hematopoietic organs.
- a3. Enumerate the important causes, presentation and management of various types of anemia.
- a4. Enumerate causes, manifestation and management of bleeding and coagulation disorders.
- a5. Recognize various parasitic diseases in different samples.
- a6. Recognize chemical and immunological changes associated with various diseases especially parasitic diseases.
- a7. Enumerate recent advances in diagnosing various hematological disorders as bone marrow transplantation, immunological treatment.

b) Intellectual skills:

By the end of this course the student should be expected to

b1. To interpret lab investigations as blood picture, bone marrow examination, results of lymph node, spleen biopsy, and tests for coagulation disorders.

- b2. Examine lymph nodes, liver and spleen and to know causes and management of lymphadenopathy, hepatomegaly, and splenomegaly.
- b3. Differentiate between samples of parasitic infection and other samples.

c) Practical skills:

- By the end of this course the student should be able to:
- c1. Perform a complete hematological examination.
- c2. Perfect different staining methods.
- c3. Perform complete urinary, sputum and fecal examinations.
- c4. Perform serological tests for detection of parasitic antibodies or antigens

d) General and Transferable Skills

- By the end of this course the student should be expected to
- d1. Work in a team.....
- d2. Communicate well with his colleagues, top management and subordinates......
- d3. Use computers in conducting researches

3. Course titles:

| Medical Biochemistry | ٦. | - | 60 |

B- Professional Information

1. Overall Aims of Course

By the end of the course the post graduate students should be able to have the professional knowledge of the biochemistry and the metabolic bases of the parasitological diseases, and able to diagnose any vitamin and calcium regulating hormones deficiency.

2. Intended Learning Outcomes of Course (ILOs)

a) Knowledge and Understanding:

By the end of the course, the student should be able to:

- a1. List the biochemical importance of intermediary metabolism (Anabolic and catabolic)
- a2. The importance of clinical biochemistry
- a3. Explain the role of vitamin, Minerals
- a4. Mention and explain hormonal action

b) Intellectual Skills

By the end of the course, the student should be able to:

- b1. Diagnosis the affected biochemical deficiency
- b2. Integrate basic biochemical and physiological facts with clinical data

b3. How to diagnose and treat as early as possible

c) Professional and Practical Skills

- By the end of the course, the student should be able to:
- c1. To identify the biochemical defect
- c2. To perform some laboratory tests for early diagnosis.

d) General and Transferable Skills

By the end of the course, the student should be able to:

- d1. Acquiring skills to use computer to enter biochemistry web sites and self learning.
- d2. Team working for accurate diagnosing of diseases using internet.
- d3. Utilize computers in conducting research and to Collect scientific data.
- d4. Use standard computer programs effectively (window, office programs).

Course Specifications of Medical Genetics in MD. Degree Of Medical Parasitology

Sohag University Faculty of Medicine

- 1. Programme(s) on which the course is given. : MD. Of Medical Parasitology.
- 2. Optional element of the 1st part of the program.
- 3. Department offering the course: Medical Parasitology
- 4. Department in charge: Histology and Cell Biology.
- 5. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title: Course Specifications of Medical Genetics in MD. Degree Of Medical Parasitology

Code:HIS0516-300

| Title | lecture | practical | total |
|-------------------|---------|-----------|-------|
| Basics of Medical | 60 | - | 60 |
| Genetics | | | |

B. Professional Information

1. Overall Aims of Course

By the end of this course the student should be able to:

Have the basic knowledge about genes morphology, structure and function, concepts of genetics and inheritance, genetic disorders and classification of genetic diseases and to prepare him/her for further studies later in the course of Modern Genetics.

2. Intended Learning Outcomes of Course (ILOs)

a) Knowledge and understanding:

By the end of the course, the student is expected to be able to:

- a1. List and identify the stages of mitosis and meiosis, as well as the cell cycle, and explain the significance of each
- a2. Enumerate the chemical nature of genetic material (DNA & RNA)
- a3. Enumerate how the DNA is organized to serve as genetic materials (gene and genome)
- a4. Enumerate the normal chromosome (structure & number).
- a5. Enumerate how the genetic information transferred to RNA during the process of transcription.
- a6. Identify the genetic code
- a7. Enumerate the translation of genetic information on mRNA into polypeptide chains
- a8. Describe gene mutation and DNA repair on the molecular levels.

- a9. Identify chromosomal numerical and structural aberrations.
- a10. Enumerate the basic concepts of Mendelian and non Mendelian inheritance.
- al1. Identify the various types of chromosomal disorders and biochemical genetics.
- a12. Enumerate the new concepts of DNA technology.
- a13. Describe the knowledge of the use of this technology in the advances disease diagnosis.

b) Intellectual Skills

- By the end of the course, the student is expected to be able to:
- b1. Integrate and evaluate genetic information and data from a variety of sources in order to gain

a coherent understanding of theory and practice.

b2. Find and evaluate new solutions to many kinds of Genetic problems.

c) Professional and Practical Training aspects:

By the end of the course the student should have the ability to: c1. Assess methods and tools existing in the area of Parasitology.

d) General and Transferable Skills:

By the end of the course, the student is expected to acquire:

- d1. Self-confidence.
- d2. Think scientifically.

d3. Create the tendency to apply the knowledge in the clinical fields.

3. <u>Course Contents:</u>

Course Specifications of Community Medicine and public Health

For MD degree of Parasitology

Sohag university

Faculty of Medicine

- 1. Program on which the course is given: MD degree in Medical Parasitology
- 2. Major or Minor element of programs: minor
- 3. Department offering the program: Medical Parasitology
- 4. Department offering the course: Community Medicine and public Health
- 5. Academic year / Level; 2nd part
- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title :Course Specifications of Community Medicine and public Health For MD degree of Parasitology

Code:COM0516-300

| Title | Lecture | Practical | Total | Credit hours |
|--------------------------------------|---------|-----------|-------|-----------------|
| public health and community medicine | 60 | - | 60 | 4 |

B. Professional Information

1. Overall Aims of Course

The aim of this course is to provide the postgraduate student with the medical knowledge and skills essential for practice of specialty and necessary to gain further training and practice in the field of Parasitology through providing:

- 2. Scientific knowledge essential for practice of Parasitology according to the international standards.
- 3. Active participation in community needs assessment and problems solving.
- 4. Maintenance of learning abilities necessary for continuous medical education.

2. Intended Learning Outcomes of Courses (ILOs)

a) Knowledge and understanding:

By the end of the course, the student is expected to be able to:

- a1. Explain the three interacting ecological factors—agent(bacteria, parasites, viruses, ect...), host, and environment—affecting the occurrence of disease.
- a2. List essential public health functions.
- a3. Define patterns of care as preventive and curative, and describe the levels of preventive care.
- a4. Define basic components of clinical epidemiology and its basic components.
- a5. Describe the public health surveillance system and its use in the community setting.
- a6. Explain different methods for prevention and control and Define methods of prevention and control for different epidemiological problems in the community.
- a7. List risk factors relevant to selected non-communicable diseases e.g cancer.
- a8. Describe the infectious cycle and Identify the infectious cycle for each of the infectious diseases.

b) Intellectual Skills

By the end of the course, the student is expected to be allowed to:

- b1. Collect and verify data from different sources about epidemiology and prevalent epidemiological problems
- b2. Select the appropriate diagnostic and solving methods for the prevalent epidemiological problems.
- b3. Link between knowledge for professional problems' solving in the area of epidemiology.
- b4. Analyze researches and issues related to epidemiology.

c) Professional and Practical Skills:

- By the end of the course, the student is expected to practice the following:
- c1.Master the basic and professional skills in the area of epidemiology.
- c2.Write reports to describe various epidemiologic problems.
- c3.Conduct Health Surveys for infectious diseases aspects.
- c4.Diagnose the epidemiological aspects of an epidemic of infectious or non infectious diseases among the community.

d) General and Transferable Skills:

By the end of the course, the student is expected to be able to:

- d1. Use information technology to serve the development of professional practice in the area of epidemiology
- d2. Use different sources to obtain information and knowledge about prevalent epidemiological problems in the community.
- d3. Learn himself continuously in the field of epidemiology.

- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title: Course Specifications of Tropical Medicine For MD Degree of Medical Parasitology **Code:** TRO516-300

| Title | lecture | clinical | total | Credit hours |
|--|---------|----------|-------|-----------------|
| Tropical Medicine and gastroenterology | 60 | - | 60 | 4 |

B. Professional Information:

1. Overall Aims of Course:

By the end of this coarse, the student should be able to have basic knowledge about fevers and its common causes. Also, the eatiology, pathogenesis, clinical picture, complications and management of the most common infectious diseases. And to understand the most common gastrointestinal and hepatic diseases especially those prevalent in our country and be able to diagnose and manage them in an efficient degree to help him/her as a future medical parasitologist.

2. Intended Learning Outcomes of Course (ILOs)

a) Knowledge and Understanding:

- By the end of the course, the student should be able to:
- a1. To know the common infectious, hepatic and gastrointestinal diseases worldwide and the most common diseases and public health problems in our country.
- a2. Enumerate the causation of diseases and new concepts in their pathogenesis.
- a3. Enumerate the clinical picture, complications and differential diagnosis of common infections
- a4. Enumerate the importance of good history taking as a first step to solve a medical problem.
- a5. List how to be a good observer
- a6. Mention learn how to look for physical signs and how to interpret them.
- a7. Enumerate the common diagnostic, laboratory, radiological and other techniques
- a8. Enumerate the various therapeutic methods/ alternatives used for common diseases (supportive therapy, nutrition, pharmacotherapy, surgical treatment etc...)
- a9. Describe general methods for health promotion and disease prevention.

b) Intellectual Skills

By the end of the course, the student should be able to:

- b1. To make a good doctor-patient relationship.....
- b2. To take a thorough medical history.....
- b3. To interpret data acquired through history taking to reach a provisional diagnosis
- b4. To interpret physical findings and correlate them with patient's symptoms.
- b5. Identify problems and find solutions
- b6. Select from different diagnostic techniques the ones that help to reach a final diagnosis.
- b7. Select the most helpful laboratory investigation to confirm the diagnosis.
- b8. To have the ability to innovate nontraditional solutions to problems.

c) Professional and Practical Skills

- By the end of the course, the student should be able to:
- c1. Perform general and abdominal examination of patients .
- c2. Interpret, conclude and discuss data collected from history and examination
- c3. Diagnose common infectious diseases(parasitic, bacterial and viral) and be able to differentiate them clinically and laboratory.
- c4. Perform basic diagnostic and therapeutic techniques and measures (pulse, temperature, giving injections and intravenous fluids, taking aspirations from pathological body fluids...)...
- c5. Recognize patients with life threatening conditions and initiate the proper management and change it according to patient's needs.

d) General and Transferable Skills

By the end of the course, the student should be able to:

- d1. Work in a team.....
- d2. Communicate well with his colleagues, top management and subordinates.....
- d3. Establish a good patient-physician relationship.
- d4. Use computers in conducting researches

7. Facilities Required for Teaching and Learning

1- Adequate infrastructure: including teaching places (teaching classes, halls & laboratories) comfortable desks, good sources of aeration, bathrooms, good illumination and safety & security tools.

2- Teaching tools: including screens, computers with CD (r/w), data show, projectors, flip charts, white boards, video player, digital video, camera, scanner, copier, colour & laser printers.

3- Computer program: for designing and evaluating MCQs.

Course Coordinator: Dr/ Mahmoud Saif Al-Islam Abd Elfatah.

Head of Department: Dr/ Gada Mostafa

Date: 18/12/2011, Revised:1/9/2012, Revised:1/12/2013, Revised 1/12/2018

Course Specifications of Histology and Cell Biology For MD. degree of Medical Parasitilioy

Sohag University

Faculty of Medicine

- 1. Program on which the course is given: MD of Medical Parasitology $(1^{st} part)$
- 2. Optional element of program.
- 3. Department offering the program Medical Parasitology
- 4. Department offering the course: Histology and Cell Biology
- 5. Academic year / Level graduates MD of Medical Parasitology
- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title: Course specification oF Histology and Cell Biology For MD. degree of Medical **Code**: HIS0516-300

| Title | Lecture | Practical | Total |
|-----------|---------|-----------|-------|
| Histology | 60 | - | 60 |

B. Professional Information

1. Overall Aims of Course

Our aim is to graduate competent parasitologist mastering the:

Scientific know ledges essential for introducing histology practices in research work of Parasitology.

2. Intended learning outcomes (ILOs):

a) Knowledge and Understanding:

By the end of the program the student should be able to:

- a1. Enumerate sufficient knowledge of the histological structure of the different body tissues and organs.
- a2. List the different methods for tissue examination.
- a3. Enumerate general histological stains.

b) Intellectual Skills:

By the end of the course the student should have the ability to:

- b1. Identify the different histological slides.
- b2. Analyze the contents of any histological slide.
- b3. Identify the histological structure of the body organs.
- b4. Interpret some of the medical importance of the histological structure.

a) Professional and Practical Skills:

By the end of the course the student should have the ability to:

c1. Master the basic and modern professional skills in Histology and Electron Microscopy

c) General and Transferable Skills:

By the end of the course the student should have the ability to:

- d1. Use the computer to enter histological web sites.
- d2. Collect scientific data from the computer.

Course Specifications of Pathology for MD. Of Medical Parasitology

Sohag University

Faculty of Medicine

- 1. Program on which the course is given : MD. Of Medical Parasitology
- 2. Optional element of program
- 3. Department offering the program: Medical Parasitology
- 4. Department offering the course: Pathology
- 5. Academic year / Level: Post graduates registered for MD program
- 6. Date of specification approval: Faculty council No. "317", decree No. "1533" dated 17/12/2018

A. Basic Information

Title: Course Specifications of Pathology for MD. Of Medical Parasitology **Code:** PAT0516-300

| Title | Lecture | Practical | Total | |
|-----------|---------|-----------|-------|--|
| Pathology | 60 | - | 60 | |

B. Professional Information

1. Overall Aims of Course:

By the end of this course the student should be able to Gain the professional knowledge and understanding of general pathology, special pathology and genetics as related to the main field of medical Parasitology. And can accurately and independently interpret the gross and microscopic pathology specimens.

2. Intended Learning Outcomes of Course (ILOs)

a) Knowledge and Understanding:

By the end of the program, the student is expected to gain the knowledge and understanding of:

- al. The deviation or change in the normal structure and function of the body on the macro- and micro levels; general pathology:
- a2. Cellular injury reversible and irreversible, causes, effects e.g. degeneration, necrosis and apoptosis (programmed cell death).
- a3. Inflammation; causes, classification, fate, complications, healing and repair.
- a4. Infectious diseases; viral, bacterial, fungal and parasitic and tissue response to these invaders.
- a5. Immunity, factors affecting immune response, disorders of the immune system
- a6. Nutritional deficiencies and their effects on the body system
- a7. Cellular growth disturbances e.g. atrophy, hypertrophy, hyperplasia, metaplasia, and dysplasia.
- a8. Study of pathology of different body organs and systems:
 - -Cardiovascular pathology
 - -Respiratory pathology
 - -Diseases of the kidney and lower urinary tract
 - -Diseases of the gastrointestinal tract, hepatobiliary system and pancreas
 - -Pathology of the male and female genital systems including the breast
 - -Hematopathology and pathology of the lymphoid system
 - -Skeletal, soft tissue and joint pathology
 - -Endocrine pathology
 - -Neuropathology
 - -Dermatopathology

-An introduction to immunohistopathology.

-An introduction to medical genetics.

b) Intellectual Skills

By the end of this program, the student is expected to be able to:

b1. Interpret the data through reading the reports reaching to the pathology laboratory along with the biopsies and excised specimens, including history, clinical examination, radiological and laboratory investigations other than the histopathology.

c) Professional and Practical Skills

By the end of the program, the student is expected to be able to:

- c1. Recognize the gross pathology specimens kept in the jars and pictures taken for unavailable gross pathology in the museum, put a diagnosis or differential diagnosis.
- c2. Describe the gross picture of the specimens and deviation of normal regarding the size, site, shape, color localized abnormality
- c3. Recognize how to deal with the specimens, fixation, trimming, processing, tissue sectioning, hematoxylin and eosin staining
- c4. Preparing and examining the slides by the bright field microscope and putting a diagnosis or differential diagnosis
- c5. Using the microscope monitor system in discussing the slides in groups to reach a result

d) General and Transferable Skills

- By the end of the program, the student is expected to be able to:
- d1. Use standard computer program effectively (windows and office)
- d2. Utilize computers in conduction with other pathology departments via teleconferences
- d3. Using the computers in searching about resent data in the libraries via the internet

A. Basic Information

Title: Medical Parasitology

Code: PAR0516300

B. Professional Information

1. Overall Aims of Course

By the end of the course the student should be able to have the perfect-creative knowledge of the parasites affecting human beings all over the world and, so to be able to efficiently diagnose and teach medical Parasitology to undergraduates and ready to develop her/his level by self learning to add knowledge in the specialty.

2. Intended Learning Outcomes of Course (ILOs):

The student is to be armed with perfect-creative knowledge about the human parasites allover the world. Each student should be able to recognize the morphological characteristics of each parasite to perform some laboratory tests needed for diagnosis and learn how to fix and examine properly parasitic slides.

a) Knowledge and Understanding:

By the end of the course the student should be able to:

- a1. Enumerate sufficient knowledge of the parasites affecting human beings all over the world and zoonoses.
- a2. Enumerate the geographical distribution and life cycle of each, inside and outside the body.
- a3. Differentiate between parasites on morphological bases.
- a4. Have the knowledge to recognize the pathology, clinical symptoms and complications of each parasite.
- a5. Have the knowledge of the recommended laboratory tests needed for diagnosis of each case.
- a6. Enumerate the knowledge of some of the drugs and instructions used for treating each case.
- a7. Enumerate the knowledge about control methods used against parasites.
- a8. Have sufficient knowledge about snails and their medical importance, especially of Egypt.

a9. Enumerate the knowledge of parasitic immunity basis.

b) Intellectual Skills:

By the end of the course the student should have the ability to:

- b1. Differentiate between parasites affecting the same organ.
- b2. Differentiate between parasites present in the same sample.
- b3. Differentiate between parasites inhabiting the same geographical location.
- b4. Criticize in a scientific pattern at least 15 published papers in the different branches of Medical Parasitology (parasite distribution and public health or statistics, lab. Animals and pathology of parasites or drugs, parasites and immunology, snails....etc.

c) Professional and Practical Skills:

- By the end of the course the student should have the ability to:
- c1.Identify the infective and the diagnostic stages of the parasites
- c2.Identify different stages of the parasites.
- c3.Identify some of the medically important intermediate host especially those present in Egypt.
- c4.Perform one or more of the following skills:
- c5.Perform some laboratory tests available in the department lab.
- c6.Perform available immunological tests.
- c7.Deal with lab animals: infecting, sacrifice, dissecting and examining.
- c8.Collecting and rearing of snails or medically important arthropods.
- c9.A box of at least 75 prepared slides of different entities are required.
- c10. Attending and participating in scientific conferences, meetings, workshops and thesis discussion that update relevant recent topics in molecular biology, relevant biochemical and geno-typing of parasites, and emerging parasitic problems.

d) General and Transferable Skills:

- By the end of the course the student should have the ability to:
 - d1. Use the computer to enter parasitological web sites.
 - d2. Collect scientific data from the computer.
 - d3. Work in groups, as a leader or as a college.
 - d4. Collect data from medical canters and patients.
 - d5. Compile a review article about a specific subject. (90 hs.)
 - d6. Participate in related scientific meetings.

- 4.1- Lectures.
- 4.2- practical lessons.
- 4.3- Assignments.
- 4.4- attending and participating in scientific conferences, workshops and thesis discussion to acquire the general and transferable skills needed.

5. Student Assessment Methods

| Method of assessment | The assessed ILOs |
|------------------------------------|---|
| 5.1- Observation of attendance and | - General transferable skills, intellectual skills |
| absenteeism. | |
| 5.2- Log book | - General transferable skills |
| 5.3-Written Exam: | |
| -Short essay: 40% | - Knowledge |
| -structured questions: 25% | - Knowledge |
| -MCQs: 20% | - Knowledge, intellectual skills |
| -Commentary, Problem solving: 15% | - Intellectual skills, General transferable skills, |
| 5.4-Structured Oral Exam | - Knowledge, Intellectual skills, General |
| | transferable skills |
| 5.5-OSPE | -Practical skills, intellectual skills |
| 5.6 Computer search assignment | -General transferable skills, intellectual skills |

Assessment Schedule :

Assessment 1 ... Review... week: 28-30

Assessment 2 ... Review... week: 58-60

Assessment 3... Preparing 3 lectures on different subjects at the student level each for 30 minutes. Tested items: 1- Suitable data level. = %

- 2- Time management= %
- 3- Modern data= %
- 4- Using available technology= %
- 5- Using educational strategies = %
- 6- Acceptable presentation and computer skills = %
- Assessment 4... Practical lessons attendance (2 years- 30 lessons) at least 75% = yes no)
- Assessment 5.. Criticize in a scientific pattern at least 15 published papers in the different

branches of Medical Parasitology= yes No

- Assessment 6..... Log book...week: 80 (14 C.Hs)
- Assessment 7.....slides box (100)...week80
- Assessment 8.....practical notebook...week....80
- Assessment 9.... Final written exam.... Week ...96-100...(24 month)
- Assessment 10.....Practical exam. & OSPE Week...96-100.
- Assessment 11.....Final oral exam...... week....96-100.

Weighting of Assessments

| OSPE Total | 100% |
|------------------------------|-------------------|
| Structured oral Examination. | 20% 20 % |
| Final written Examination | 40% |
| practical notebook | week120=2% |
| slides box (75) | week100= 5% |
| Log book | week: $100 = 3\%$ |
| 2 Reviews | week: 28-30= Pass |
| Periodic Examinations | =10% including: |

6. List of References

6.1- Lecture notes

6.2- Essential Books (Text Books)

- -Diagnostic Medical Parasitology(lynne Garcia).6th edition 2016
- -Essential Parasitology.
- -Worms and human diseases.
- -Clinical Parasitology.
- Foundations of Parasitology.
- -zoonosis of parasitology

6.3- Recommended Books

A coloured Atlas of tropical Medicine and Parasitology.

6.4- Periodicals, Web Sites:

Parasitology Research Division of Biology, Kansas State University mri.sari.ac.uk/parasitology.asp British Society of Parasitology. And others

7. Facilities Required for Teaching and Learning

- 1. Adequate infrastructure: including teaching places (teaching classes, halls & laboratories) comfortable desks, good sources of aeration, bathrooms, good illumination and safety & security tools.
- 2. Teaching tools: including screens, computers with CD (r/w), data show, projectors, flip charts, white boards, video player, digital video, camera, scanner, copier, colour & laser printers.
- 3. Computer program: for designing and evaluating MCQs.

Course Coordinator: Dr. aml Mostafa Ahmed
